

# SHB *ant* Swiveling Halyard Blocks

## New Swiveling Halyard Block

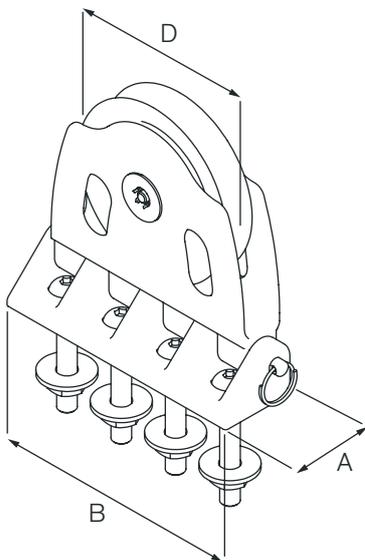

This special block has been designed to direct the halyards from the mast base to the winches.

Compared to the known “hollow pin” models, it offers two advantages:

- The halyard **exit is lower** (closer to the deck).
- The narrow base **allows the assembly of more blocks** in the narrow space of the mast base.

There are actually two sizes available (see the following tab).

## Sizes available

MODEL →	00819	01019
<b>SIZE (D) mm</b>	80	100
