## **FORESPAR<sup>®</sup> FLANGE FITS SELDEN MAST CARS**

**FOR FORESPAR<sup>®</sup> POLES/END FITTINGS USE ON SELDEN CARS**  
An easy solution for the compatibility problems of the past

Forespar<sup>®</sup>, a world leader in downwind sailing equipment now offers a simple solution for the compatibility issues of using Forespar<sup>®</sup> poles and end fittings on Selden mast cars; The #332004 Selden FC Flange.

**#332004 SELDEN FC FLANGE**

**SELDEN #511-699 CAR**

**SELDEN 511-553 CAR**

The #332004 Flange will fit any Selden mast car that uses the Selden #534-800 flange. It is a quick fix by simply removing the Selden flange and installing the Forespar<sup>®</sup> flange using all the same pins, spacers and keepers on the Selden car. You hardly need tools!

The new flange will allow any Forespar<sup>®</sup> "XP", "TR", "EL", "UXP" or "UTR" style end fitting to comfortably fit and function without binding. You can even use this assembly for vertical storage of poles up the mast. All stainless steel construction with a Marelon<sup>®</sup> spacer (spool) so there is no metal/metal contact when aluminum ends are used, the flange also features a welded S/S metric tube to fit the Selden car hinge pins.
